Note:	• Standard Optional - None Same configuration as on the left side				

Farizon H9E

Stronger Load-Bearing Capability

The entire vehicle is developed and engineered specifically for the application, featuring a high-strength chassis and stronger load-bearing capability.

Smart Cabin, Better Experience

Cool & Modern Design
Integrated grille and headlamp design, featuring LED headlights and LED daytime running lights, creating a modern and stylish appearance.

Smart Cabin
Equipped with smart features, keyless entry, reversing camera, integrated instrument display, air-suspension seat, 12.8-inch HD central touchscreen, 360° surround-view system, and intelligent human-machine interaction.

Fast Cooling
The refrigeration system can reach the required cooling temperature quickly, with cooling performance approximately twice as fast as conventional fuel-powered systems.

Save More · Drive More

Intelligent & Effort-Saving
EPS electric power steering, cruise control and hydraulic tailgate help reduce driver effort and fatigue.

More Trips, More Savings
Lower transportation operating costs compared with conventional fuel vehicles, with fuel-related costs potentially reduced by 20–35%. with a daily driving distance of around 200 km, annual savings can reach 40,000+ RMB.

Fast Charging
upports fast charging / ultra-fast charging. The battery can be charged from 20% to 80% in approximately 20 minutes, and the refrigeration unit can operate while charging.
